

Introduction: Positioning Zapier

This chapter offers a quick flyover so that you can start thinking about how to position **Zapier** along with your service offerings, and conduct focused client discovery to deliver value.

Common Automation Challenges

Understand the struggles many of our shared clients face when managing complex workflows or processes that Zapier can automate.

Discovery Questions

Learn how to ask the right questions to reveal pain points that Zapier can address.

- Identify manual time consuming tasks
- Uncover integration challenges
- Discover workflow bottlenecks

Helpful Resources

Discover specific language, frameworks, and resources you can integrate into your sales process to make it easier to present Zapier as the solution.

- Zapier's Value propositions
- Talk tracks for common scenarios
- Presentation templates

Steps to Understanding Client Needs

Active Listening

Actively listen to your client's business challenges, goals, and workflows.

Focus on Pain Points

Focus on uncovering pain points related to manual tasks, inefficiencies, or tools that aren't integrating well.

Ask Discovery Questions

Use targeted questions to understand their specific needs and challenges.

Match Solutions

Connect their needs to your service offerings and weave in Zapier's capabilities where there's a fit

By identifying pain points and operational challenges, you can match the right solutions to meet their goals.

Active listening: Probing with Discovery Questions

Take a solution oriented approach to talking with prospective customers. Some customers may come to you with specific and immediate projects, but others are unsure of what they need. The world of automation can be daunting. In either case, you can probe further to understand underlying pain points, or reveal additional opportunities that client's didn't realize existed. Try these discovery questions:

Workflow Questions

- "What manual tasks take up most of your team's time?"
- "What specific processes or workflows are creating bottlenecks in your business?"
- "Which apps do you use daily, and how well do they communicate with each other?"

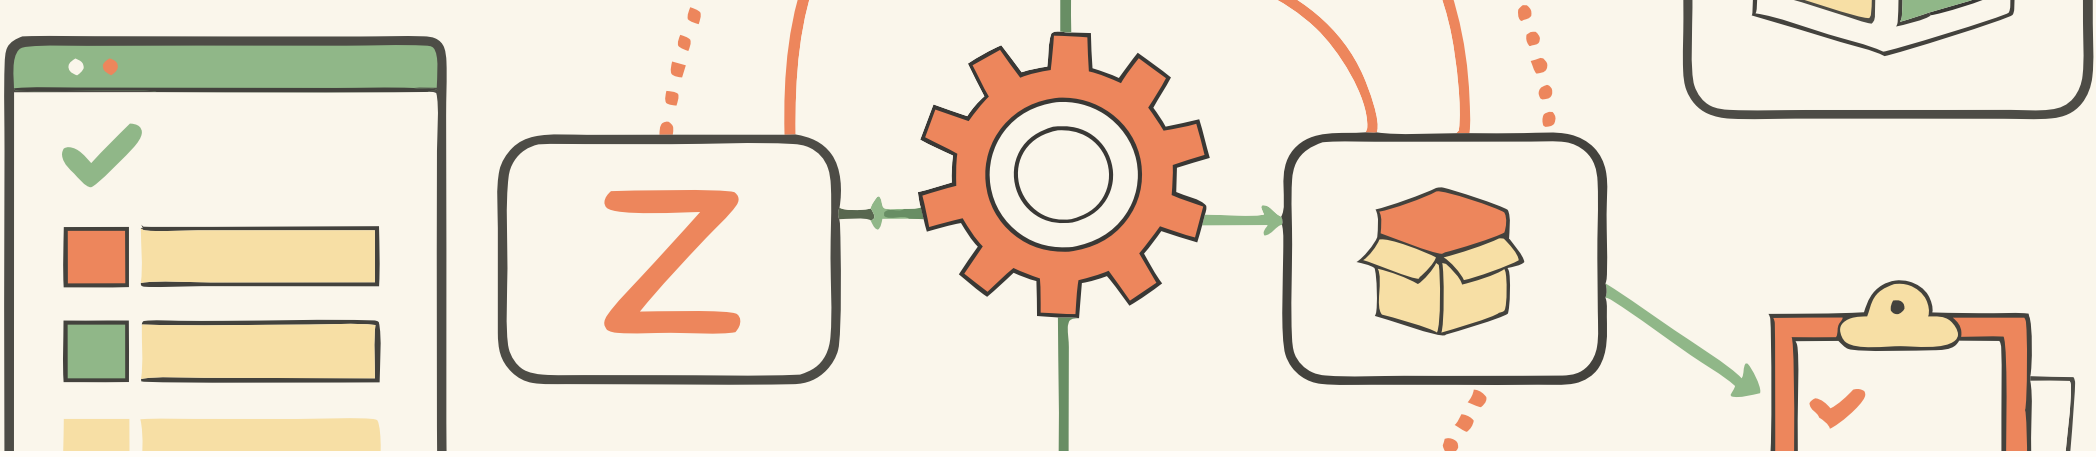

Technical Resource Questions

- "Are developers currently building custom solutions? Do you have access to a development team?"
- "Would you say it's easy for you to get access to developers?"
- "How easy is it for you to get technical support for projects?"

Implementation Questions

- "Think back to the last time you tried to roll out something new. How did it go?"
- "What happens when you need to ship something new today?"
- "When your team runs into an automation challenge, what happens today?"

For a deeper look and discovery, and more sample ideas, [reference this page in the partner portal](#).

Matching Solutions to Client Needs

Tailor Your Service Offering

Fit your service offering to the client's pain points, showing how your services will help them achieve their goals, and alleviate pains. Discuss Zapier's critical role in the tech stack and in your work.

Position Zapier

Based on the client's needs, position Zapier as the solution that automates manual tasks, reduces operational costs, and increases workflow efficiency, depending on the specific pain

Highlight How Zapier Breaks Down Silos

Emphasize the seamless integration Zapier offers across teams and tools to improve operational efficiency, and how it scales regardless of organization size

Position Zapier as a Workflow Un-blocker

Show how automation with Zapier can alleviate workflow bottlenecks and help teams focus on high-value tasks.

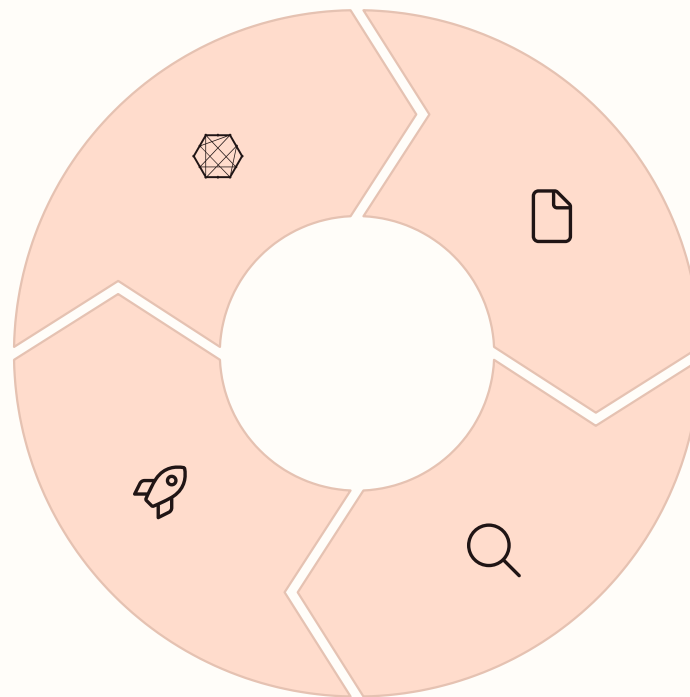

Zapier's Value Propositions

Breaking Down Silos

Connect disparate tools and teams, improving operational efficiency across the organization.

Workflow Unblocker

Alleviate bottlenecks and help teams focus on high-value tasks through powerful automation.

Flexibility

Whether it's simple or complex workflows, Zapier's versatility allows businesses to grow without outgrowing their automation tools.

Vast Ecosystem

Connect critical tools across marketing, sales, and operations through Zapier's extensive app integrations - 7000+
