

Boost conversions with Lead Management

your lead lifecycle

01 Speed-to-lead and routing

Record lead details, add external data, and follow up immediately.

02 Personalization and enrichment

Create personalized experiences for each contact.

03 Intent based nurture

Trigger communications on the right channel, at the right time.

04 Full funnel customer view

Get visibility into your customer across the full pipeline—wherever you need it.

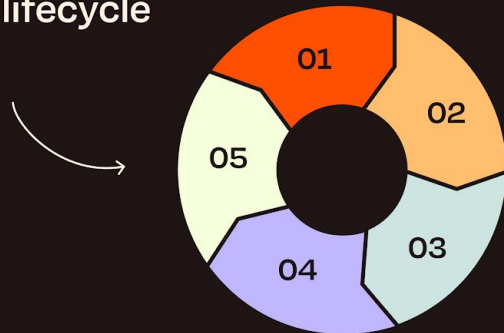

05 Campaign reporting

View the performance of specific campaigns, and track attribution.

More revenue from your team with Sales Pipeline Management

your deal lifecycle

01 Speed-to-lead and routing

Get leads to your team fast—so you can close them faster.

02 Account 360° and enrichment

Informed deal strategy, without having to hunt down account info.

03 Opportunity Management

Automate your pipeline and keep your team selling.

04 Deal desk and rep support

Make it easy to get approvals & cross-functional help.

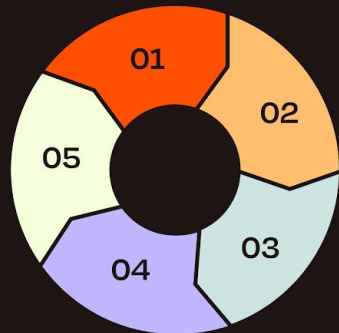

05 Account-based marketing

Close more whales with personalized buying experiences.

Run campaigns that convert with Campaign Management

your marketing
customer journey

01 Event coordination

Increase attendance rates by automating registrations, routing and followups.

02 Advertising list management

Route new leads, follow up, and update your list to drive new conversions.

03 Product & editorial calendar

Create a centralized view of what's launching when.

04 Email automation

Trigger emails on contact behaviors, and connect email systems with your customer data source of truth.

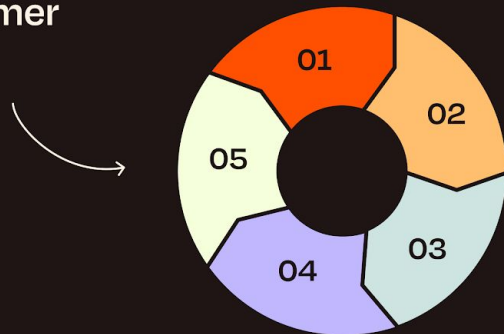

05 360° campaign reporting

Create more impactful campaigns with attribution, reach, performance, and more by channel.

Keep CSAT high and time-to-close low with Customer Support Management

your customer lifecycle

01 360° customer view

Ensure your team can see everything they need, right in their support tool.

02 Product x Support feedback

Share product feedback and track the impact of issues or incidents.

03 Readiness and enablement

Make sure your reps are informed and trained on new products and services.

04 QA & performance management

Keep quality high by surfacing the right tickets and sharing feedback.

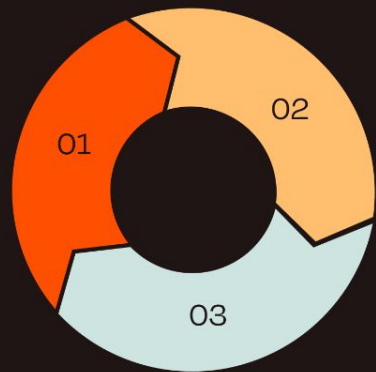

05 Churn prediction

Identify accounts at risk and keep churn from impacting your growth.

Unsililo data

Data lifecycle

01 Data transfer

Transferring data between different sources and surfacing the needed data in the appropriate format

02 Data centralization

Consolidating data from different sources, often for reporting purposes

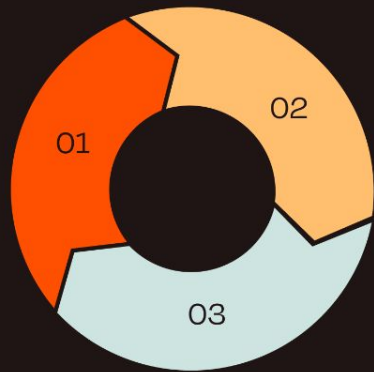

03 Document storage

Uploading, updating, sharing, and backing up files, as well as generating documents based on specific data

Streamline projects

Project lifecycle

01 Task creation

Automated task creation and assignment to reduce manual overhead

02 Task follow-up

Project updates in real-time that notify teams and stakeholders about changes in project-related tasks

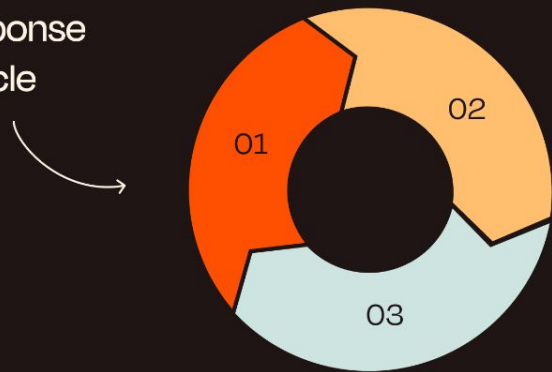

03 Team communication

The processes that enable teams to collaborate on projects and keep the right people in the know

Coordinate IT response

IT response
lifecycle

01 Ticket creation

Initial receipt of service need or incident from different systems and automated ticket creation

02 Triage/assignment

Prioritization of issues/incidents based on severity and assigning to the right teams

03 Communication

Updating of relevant stakeholders on issue/incident status
