

Understanding Zapier's Revenue Requirements

Managed Revenue (MR) & Referral Revenue (RR)

To grow in Zapier's Solution Partner Program, you can demonstrate impact through one or both revenue requirements that showcase your value as a strategic partner in our ecosystem.

Referral Revenue (RR)

Net-new Zapier business you drive through strategic client referrals

Managed Revenue (MR)

Clients you actively support with ongoing automation services

🟢 **Currently, partners only need to meet one of these requirements to advance.** In the future, **both** will be required to progress (date TBD).

What is Referral Revenue (RR) vs Managed Revenue (MR)?

🎯 Referral Revenue (RR)

Definition: The total value of Zapier subscriptions from clients you submitted via the referral program who convert to paying Zapier users.

Value: Demonstrates your ability to generate net new business.

Benefits:

- **20% referral commission** (based on subscription type)
- Counts toward partner tiering (see thresholds)
- Automatically tracked when you submit clients via the Partner Portal or SPOT

🔧 Managed Revenue (MR)

⚠️ **MR submissions are available to Silver+ partners only.**

Definition: The total value of Zapier subscriptions from paying Zapier clients who simultaneously receive your team's ongoing automation support—even if you didn't refer them.

Value: Recognizes your long-term support and impact with Zapier clients.

Benefits:

- Counts toward partner tiering under MR-specific thresholds
- Requires submitting Managed Service Agreement (MSA) dates after creating the client record
- *Not eligible for commission*

💡 Notes about RR & MR submissions:

01

All client submissions are considered for RR

If the client becomes a paying Zapier user within **90 days** of submission, RR + commission apply.

02

90-day conversion window

You have up to 90 days to convert referral submissions. If a referral does not convert, you can **resubmit** them

03

Optional MR addition

You may optionally add MR for any clients you submit by adding valid **MSA dates** (max 12 months per submission).

04

Dual benefits possible

If you **referred and support** the same client, you can earn both RR and MR (RR from conversion; MR for the paid period overlapping your MSA).

💰 How commission is calculated

When you convert net new referrals, you are eligible for commissions, in addition to RR credit.

Monthly Subscriptions

20% of each monthly payment

Annual Subscriptions

20% of the full annual amount when paid

Renewals

After the first 12 months, resubmit still-paying clients for **10% renewal commission** (maximum of 24 months total)

📏 How RR and MR are calculated

Referral Revenue (RR)

- **Annual plan:** RR credit for the full annual payment on the day it's paid
- **Monthly plan:** RR credit each month as the client pays
- **365-day lookback:** On your tiering anniversary, Zapier looks back 365 days of RR to check compliance
- You may **resubmit** clients for RR after their first 12 months if they're still paying for additional credit toward your RR value.

Managed Revenue (MR)

- Credit for Zapier subscription payments during your MSA dates (max 12 months per MSA submission)
- **365-day lookback:** On your tiering anniversary, Zapier looks back 365 days of MR to check compliance
- Still managing a client after a 12-month MSA? **Re-submit a new MSA** to continue being credited for MR

📦 How to submit clients for RR and MR credit

You can submit clients via the **Partner Portal** or with **SPOT**, our Solution Partner Operations Tool. In both paths, you always submit a client first, which will automatically be considered for Referral Revenue (RR), then optionally add MR by supplying MSA (Managed Service Agreement) dates.

🐞 **WATCH THIS** clip for help, and reference the guide below!

Option 1: Partner Portal

User-friendly web interface for manual client submissions and MSA management, ideal for individual entries.

Option 2: SPOT (Silver+ only)

Solution Partner Operations Tool for automated bulk submissions and integrations, best for managing many clients.

Partner Portal Process

Step 1: Submit Client (RR-eligible)

Go to **Client** tab in the partner portal → **Submit a Client in the far right.**

1. Ensure BEFORE submission that the email you're going to submit is the **owner** of the Zapier Account. (VERY IMPORTANT)
2. If you are an admin and assigning a client to a team member, make sure to update the **Partner Contact** and **Owner fields**. Otherwise, they default to your own and no further action is needed.

This initial submission automatically registers the client for Referral Revenue (RR) consideration. If the client becomes a paying Zapier user within **90 days** of this submission, you receive RR credit and are eligible for referral commission.

Step 2: Add MR (Optional, Silver+ partners only)

After submitting the client, continue with **Submit Managed Revenue**. Here, you'll enter your Managed Service Agreement (MSA) start and end dates (maximum 12 months per submission).

Adding these dates signifies that you are actively providing ongoing automation support to the client, even if you didn't refer them. This step allows you to earn MR credit for the covered period, recognizing your long-term engagement and value in supporting Zapier clients.

SPOT Process (Silver+ only)

1

Step 1: Authenticate

Begin by authenticating your connection using your unique Partner Account ID (Find it [HERE](#)) and the Account Owner's Email (Find it [HERE](#)).

2

Step 2: Submit Client Details

Complete all required client information:

- a. Client's Email (Owner Email): Make sure this is the OWNER of the Zapier account, otherwise it will not count towards referral or managed revenue NOR referral commission.
- b. Partner Contact ID: Who you want to be the owner of this client, if you have multiple sales people. **Note:** If you assign a Team Member ownership, other team members will still be able to see this Team Member's lead.
- c. First Name: First name of your client
- d. Last Name: Last name of your client
- e. Company: Company name of your client
- f. Description: Description of your engagement with the client
- g. Company Size: the size of the company

This action registers the client, automatically initiating their eligibility for Referral Revenue (RR) if they convert to paying clients within the 90-day window.

3

Step 3: Add MR (Optional)

To claim Managed Revenue (MR) for this client, set the 'Submit as Managed Revenue' flag to TRUE within the submission, then provide the MSA Start and End dates (max 12 months).

- a. Start Date: The start date of your contracted work with this client.
- b. End Date: The end date of your contracted work with this client. It cannot be more than a year from your start date.

This links your ongoing service agreement with the client's Zapier subscription, allowing you to accrue MR credit for the period of active management.

🚫 **SPOT rate limits:** 150 max calls simultaneously; 30-second timeout. For bulk updates, add a Delay After Queue step.

📝 Best practices for RR & MR submissions

Short projects (Zap fixes) for MR

Submit a **1-month** MSA window for quick fixes and one-time optimization projects

Retainers

Submit **12-month** MSA windows; re-submit annually for ongoing retainer relationships

New engagements

Submit a **new MSA** when starting fresh projects with existing clients - just click to the clients tab.

RR resubmission

After **12 months**, re-submit still-paying Zapier clients; Year 2 referral commission is **10%** if the client remains active

🏆 Partner tiering thresholds (rolling 365-day lookback)

Tiering	Referral Revenue (RR)	Managed Revenue (MR)
Silver	≥ 1 converted referral	—
Gold	≥ \$2,000	≥ \$5,000
Platinum	≥ \$5,000	≥ \$10,000

MR does **not** count "equally" with RR; each has its own threshold for tiering.

📋 Quick reference table

Metric	What it is	How it's calculated	How to submit	Commission	Duration / Lookback
RR	Net-new Zapier clients you submit who convert to paid	Actual payments (annual = full when paid; monthly = each month)	Submit client via Portal or SPOT	✅ Yes • 20% year 1 • 10% year 2	Rolling 365-day lookback
MR	Paying Zapier clients you support under an MSA	Payments within your MSA dates (max 12 months per submission)	Submit client as above, then add MSA dates	❌ No commission	Rolling 365-day lookback

📅 Tiering up any day

Zapier uses a **rolling 365-day lookback** on your **tiering anniversary** to verify RR and MR compliance. Submit clients promptly; add MSA dates when you start support; re-submit MSAs annually for ongoing work.

Key Takeaway

Success in Zapier's Partner Program comes from consistent client submission, strategic MSA management, and understanding the distinct value of both referral generation and ongoing client support. Focus on building long-term relationships that benefit both your clients and your partnership growth.
